## Installation Instruction

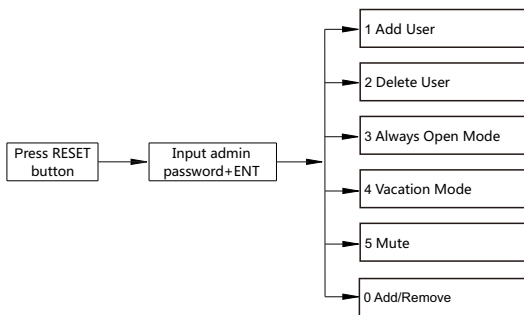

# Setting Guide

## 1.Factory Default Reset

User should reset device for safety when receiving it first or if forget the password or if lost card. The reset way : hold the reset button(keep YELLOW and BLACK wire together) about 7s, when hear "Di " sound, then release the button, device will be reset. Factory default reset will reset all user (password and card) , so be carefully to do reset.

## 2.Admin mode & Menu

Press Reset button(YELLOW and BLACK wire connect then separate quickly ), when hear "Di " sound, then input admin password + ENT (default admin password is 123456).

## 3.Add User

WallReader support add password user and card user. Only the Admin User can add/delete users, normal user can't. Max support 230 user capacity, each user have an unique ID(001~230) , Admin User from ID001~009, Normal User from ID010~230.

### 3.1 Add admin user

Admin user can add/delete admin or normal user, and unlock. ID ( 001~009 ) for admin user. The operation of add user is below:

Note:

Password should be 4~6digits,if it less than 6digits,please input ENT to end. If it is 6 digits, no need to input ENT.

### 3.2 Add Normal User

Normal user can only unlock, can not add/delete any user. ID ( 010~230 ) for normal user. The operation of add user is below:

Note:

(1)When input ID, system will assign an ID (small to large) automatically if using ENT replace an id number, this way only suitable for normal user ID, if you create an admin user, you have to input id.

(2>Password should be 4~6digits,if it less than 6digits,please input ENT to end. If it is 6 digits, no need to input ENT.

### 4.Delete User

You should delete a user if you disable it.

Note:

(1)When input ID, system will assign an ID (small to large) automatically if using ENT replace an ID number, this way only suitable for normal user ID, if you create an admin user, you have to input ID.

### 5.Always Open Mode

Always open mode means the lock is always opened, anyone can open the door without using the password or card. Please consider the situation before enable this mode, and exit in time.

### 6.Vacation Mode

Once users execute vacation mode,it means only the admin user can unlock the door. Once admin user unlock the door, it will exit Vacation Mode automatically.

### 7.Mute

Users are able to mute the lock for any voice prompts.

## 10. Inclusion/Exclusion

Device can be added to a Z-Wave gateway or controller. Please make gateway in learn mode first, then operate device to send a NIF.

The device can work with mobile APP and other home automation devices through a Z-Wave gateway. With the gateway, users can track all the open log, check device status, make association, authorization, issue temporary password to visitors/cleaners, etc.

The device is standard Z-Wave device, it is compatible with all Z-Wave gateway, please refer to each gateway manual for details.

Here we are going to introduce how the device work with iSurpass gateway and APP system.

## 1. APP Download and Installation

Please scan the QR code and follow the instructions for downloading and installation. Please allow the required permissions of the APP during installation.

Android

IOS

## 2. Registration

After installation, Users need to register before using iSurpass APP

(1)Run the APP.  
(2)Click "Registration" on the login page.

(3)Choose country code. Input mobile phone number. Get "SMS verify" .

(4)Enter SMS verification code. Then, " Next Step" .

(5)Set User code (1~6 numbers) to complete the registration.

### 3. Gateway Association and Network Setting(AP Mode)

This device adopts Z-Wave protocol to achieve smart control. To make it work, users have to add a Z-Wave gateway to APP.

After adding the gateway, please set up the network immediately and make it connect to the Internet.

- (1)Login APP.
- (2)Click the "Scanner" icon on the top left.

- (3)Scan the QR code which is pasted on the back side of the gateway

note :  
Please don't loose QR code.

- (4)Give it a name and save.

- (5)Distribution Network.

- (6)Choose the same WiFi with the phone connected, then Next Step.  
(This wifi must support the gateway to connect internet)

- (7) Power ON the gateway, wait until RED led blink quickly  
(If users want to change the WiFi connection, they can press and hold down the button several times until RED LED blink).  
(8)Next Step.

(9) Mobilephone connect the gateway's hotspot .

(If it can't be done automatically, please do it manually. Gateway hotspot is named by "iRemote\*\*\*\*\*", password:12345678)

(10) Start Configuration.

(11) Configuration successfully.

### Smart Link (optional)

Smart link is a secondary way for user to do association and network setting, but this requires a high quality WiFi connection.

1. Make your phone connected to WiFi.
2. Run iSurpass APP-- Setting Page--iSurpass-- "+" icon--Adding iSurpass.
3. Choose the same WiFi with phone connected, and input password.
4. Power on gateway, press and hold the button until Green LED blink quickly.
5. Click "Next Step" to start configuration.
6. Gateway will be added to the system successfully.

Gateway should be able to connect to wifi after config, then add the door lock into gateway.

## 4.Add device

Add the door lock to the system to enjoy smart control.

(1)Run APP and login

(2)Home Page, Click "+" Button on the top right.

(3)Choose Z-Wave device & iSurpass gateway, and name for the device.

(4)Add device.

(5)Trigger the device.

(See Inclusion/Exclusion)

(6)Trigger the device again .

(See Inclusion/Exclusion)

(7)Wait until add successfully.

You will see a new icon in home page when add successfully, then you can remotely controlled it via app.

## 5. User setting

Users can add new users on iSurpass APP, include Password User, Card User, Fingerprint User. Please check which user type your device support.

### 1. Inclusion/Exclusion

Exclusion : Delete a device for Z-Wave network.

1 ) Set gateway in Exclusion mode or delete mode. [ please refer to gateway guide]

2 ) Set wallreader in learn mode. [please refer to Inclusion/Exclusion]

3 ) Wait until success. [ please refer to gateway guide]

Inclusion : add a device into a Z-Wave network.

1 ) Set gateway in Inclusion mode or add mode. [ please refer to gateway guide]

2 ) Set wallreader in learn mode. [please refer to Inclusion/Exclusion]

3 ) Wait until success. [ please refer to gateway guide]

### 2. Association

Our product support two association groups, and each group support five nodes.

Group1:lifeline group associate lock report, user code report, battery report and configuration report.

Group2:notification group.

### 3. Configuration

Our product support configuration command class, but no any parameters can be configured.

### 4. Supported Z-Wave command class

Inclusion as unsecurity:

COMMAND\_CLASS\_ZWAVEPLUS\_INFO,  
COMMAND\_CLASS\_MANUFACTURER\_SPECIFIC,  
COMMAND\_CLASS\_SECURITY,  
COMMAND\_CLASS\_BATTERY,  
COMMAND\_CLASS\_ASSOCIATION\_V2,  
COMMAND\_CLASS\_ASSOCIATION\_GRP\_INFO,  
COMMAND\_CLASS\_POWERLEVEL,  
COMMAND\_CLASS\_BASIC,

Inclusion as security:

COMMAND\_CLASS\_ZWAVEPLUS\_INFO,  
COMMAND\_CLASS\_MANUFACTURER\_SPECIFIC,  
COMMAND\_CLASS\_SECURITY,  
COMMAND\_CLASS\_BATTERY,  
COMMAND\_CLASS\_ASSOCIATION\_V2,
